

Two Great Bioblitz Events in 2018!

The **City Nature Challenge 2018**, which covers the MD, DC, and VA metro area, is scheduled for **April 27-30, 2018**; and the **Arlington County BioBlitz** is planned for **September 2018**.

The [City Nature Challenge](#) is coming to the DC Metro area April 27-30. Many events in local parks are being planned and the Arlington Regional Master Naturalists are asking everyone to join the DC Metro Area team to document as many different species and observations as possible during April 27-30! We will be joining with many other local groups for this exciting citizen science project.

Please plan to participate and help document the biodiversity of the nation's capital and surrounding areas by making as many observations of as many species as possible! Here is [more information](#) from iNaturalist, including the list of cities and counties included in our region, training opportunities, and where you can get more information.

The **Arlington County BioBlitz** will happen in September and will focus on four to five county parks with dates and other details yet to come. For observations recorded during Arlington's first ever bioblitz in 2017, see <https://www.inaturalist.org/projects/2017-arlington-county-virginia-bioblitz>. More details will come soon!
